FEEDING DIRECTIONS: Feed free choice as the sole ration. Keep feeders about ½ full at all times. Feed should be fresh and feeders clean to help avoid disease. Supplemental grit may be provided if birds are confined to a cage. Grit helps in feed digestion. Provide plenty of fresh, clean water at all times. Layers should receive about 16 to 17 hours of light per day for optimum laying potential.

This feed was produced in a facility certified in the American Feed Industry Association's Safe Feed/Safe Food Certification Program; for details go to: www.safefeedsafefood.org.
